To Whom It May Concern:

Hello, my name is Ben Reeves and I'm a student at the University of Michigan pursuing a Bachelor's degree in Computer Science. I'm originally from Naperville, IL, and I am seeking a part-time summer internship where I can put my 6 years of programming experience to good use. I am an avid hobbyist programmer, but I have always wanted to be part of a greater software development team. When I saw your job listing, I knew it would be a great place to start.

The most important thing you should know about me is that I'm passionate about Computer Science and passionate about learning. I pride myself in my work and take care to attend to detail, always doing my best to keep in mind the deadlines and the end goal. I work very quickly and proficiently in Java and C++, and I have a surprisingly broad knowledge of basic algorithms, data structures, and object-oriented coding practices. I have also fooled around with multiprocessing and concurrency and am familiar with the importance of thread synchronization.

I have attached my resume along with this cover letter in my application. I would greatly appreciate if you would also check out my LinkedIn profile and my GitHub page to see much more information about the different projects I have worked on. I hope you'll find my skill set impressive and adequate for the position. If you would like to contact me for an interview, or for any other reason, feel free to email, call, or even text me. I am available Mondays, Wednesdays, and Fridays after 2 P.M. and Thursdays after 11 A.M. (Eastern Time).

Sincerely,

Ben Reeves
